Open to **Corporate Planning** & **Financial Analyst** roles · 2025 Economics graduate, GPA 3.84

Rizka Ayu Dwi Sugiharto

Currently interning at Pelindo · ready to start a full-time role immediately · open to placement anywhere in Indonesia

Contact me

About me

I work where the analysis meets the tools. I can build the economic case, such as an industry outlook, an ARDL model or a financing comparison, **and** the spreadsheet or dashboard that keeps those numbers up to date for the people who decide.

I like turning scattered data into one clear picture: plan-versus-realization reports, budget reconciliation, KPI monitoring. I'm careful with official documents and deadlines: at the ministry, reconciliation and annual reports went in **100% on time**. I also learn new systems quickly, from DELMIA Quintiq to Apps Script.

3	3.84	583
Internships	GPA (out of 4.00)	English (EPT) score

What I can deliver right away

Strategic plan & KPI monitoring

Quarterly RJPP progress reports on strategic initiatives, KPIs and RKM, plus long-term plan drafting and BOD materials.

Done at **Pelindo Sinergi Lokaseva**

Budget planning & financial administration

Annual budget plan (RKA), validation of SPM, grants and official-travel documents, monthly reconciliation and annual reports.

Done at **Kementerian Imigrasi dan Pemasyarakatan**

Industry research, econometrics & dashboards

Market and macro research, ARDL regression in Stata/EViews, and live Google Sheets + Apps Script dashboards.

See **Industry Outlook 2026** and **dashboards**

Work experience

Strategic planning at a port-logistics SOE, finance & budget administration at a ministry, and supply chain planning at Pertamina's training & consulting arm.

PELINDO SINERGI LOKASEVA

PT Pelindo Sinergi Lokaseva

Strategic Planning Intern

Jun 2026 – Present

North Jakarta

Strategic Planning & Transformation

With the team at the Board of Directors farewell & welcome event ("Pisah Sambut Direksi"). Part of the Pelindo Group (Danantara Indonesia).

- Monitored quarterly **RJPP 2026** implementation, completing progress reports **50% faster**, and helped draft RJPP 2026–2030.
- Conducted a comparative analysis of Terminal Kijing's financial realization to support management performance evaluation.
- Conducted market research and macroeconomic analysis for the Industry Outlook 2026, handling about 90% of the research and analysis independently.
- Analyzed the impact of geopolitics, exchange rates and the BI Rate on export–import performance using **ARDL regression**.
- Prepared data and presentation materials for the Board of Directors at ASEAN Port & Logistics 2026 (8 July 2026).
- Built the **Innovation Hub** dashboard (Google Sheets + Apps Script), bringing **453 ideas** from 2022 onward into one live view so any employee can submit an idea at any time, not only during competitions.

Quarterly RJPP progress reports delivered 50% faster

Work sample: **Industry Outlook 2026 — port benchmark, vessel trends & ARDL regression ↓**

Kementerian Imigrasi dan Pemasyarakatan

Finance & Budget Administration Intern · Bureau of Planning and Finance

Nov 2025 – May 2026

Gedung Direktorat Jenderal Imigrasi, South Jakarta

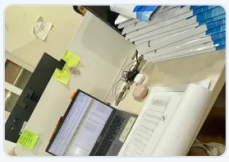

MagangHub program (Kemnaker RI)

With fellow interns at the ministry's Eid al-Fitr gathering ("Silaturahmi Hari Raya Idul Fitri").

- Organized **600+** financial and partnership records, improving data accessibility and reporting efficiency by **20%**.
- Validated **200+** financial documents, including payment orders (SPM), grants, bank accounts and official travel documents.
- Assisted in preparing the annual budget plan (**RKA**), contributing to a **15%** improvement in forecasting accuracy.
- Supported monthly reconciliation and annual financial reporting with **100% on-time** submission.
- Built the team innovation **SI-REKAP PERJADIN**, a travel-expense recap web app replacing manual input that took **3–4 days for ~50 files**; now being further developed by the ministry's IT team.

Completed the internship with an "Excellent" (Sangat Baik) rating

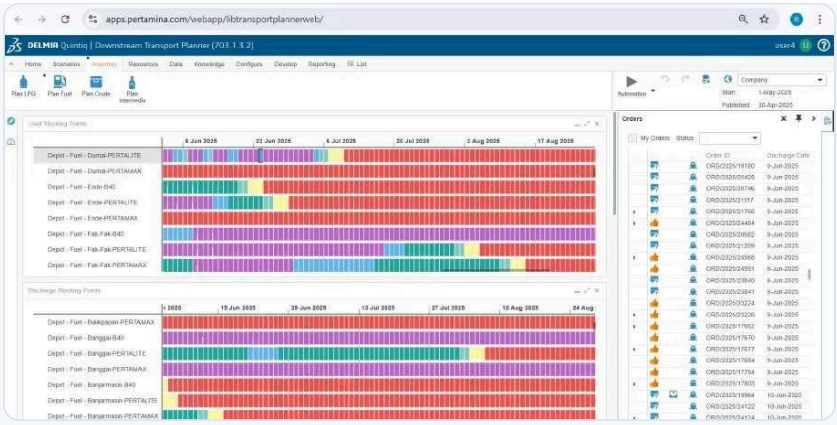

PT Pertamina Training & Consulting

Administrative Representative – Supply Chain Planning

May 2025

Central Jakarta

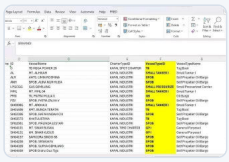

1-month internship

Monitoring national fuel distribution schedules in DELMIA Quintiq.

- Monitored fuel distribution across **120+ locations in 8 regions** using DELMIA Quintiq to optimize delivery schedules.
- Maintained daily distribution data with **95% accuracy**, improving planning reliability.
- Classified and mapped **20+** industrial tankers for more efficient logistics allocation.
- Developed automated Excel and Google Sheets reports, increasing reporting efficiency by **60%**.

Completed all assigned duties well — official completion letter from HC & GA

Organization & volunteering

ICOSI & ICIEFI 2024

Liaison Officer (LO) · International Conference on Sustainable Innovation

Aug 2024

Yogyakarta

Volunteer

- Coordinated communication and schedules for **100+ participants** during a one-day academic conference.
- Managed participant logistics and coordination throughout a **2-month** pre-event preparation period.
- Supported participants promptly, contributing to **90% positive feedback** in the post-event survey.

Dec 2022 – Sep 2023

Yogyakarta

10-month term

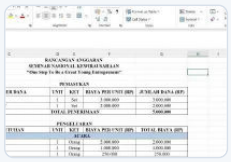

Economics Student Association (HIMIE), UMY

Secretary, Entrepreneurship Division

- Managed **50+** letters and administrative documents for a 30+ member division.
- Developed **15 SOPs** to streamline division workflow and document approval.
- Supported **10+** entrepreneurship events with 100+ total participants through documentation, administration and reporting.

Projects & work samples

Industry research from my Pelindo internship, an independent investment case study, and two dashboard web apps — redrawn here from the original slides.

Industry Outlook 2026 — PT Pelindo Sinergi Lokaseva

Market and macroeconomic research for the company's 2026 outlook: a global port benchmark, domestic container vessel trends, and an econometric model of Indonesia's exports.

Market research | Macroeconomic analysis | ARDL · EViews / Stata | Lloyd's List · WSC data

Global trend: supporting zones at the top container ports. Leading ports don't stop at terminal handling — supporting zones create logistics, industrial, processing, warehousing and distribution activity.

10 / 10
of the Top-10 WSC 2024 ports reviewed have an identified supporting ecosystem

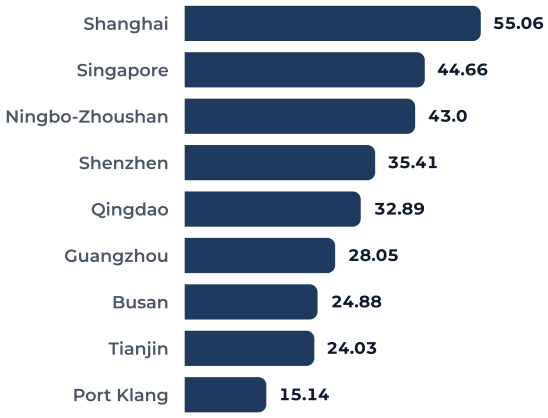

57 km²
JAFZA free zone near Jebel Ali Port; industrial + warehouse + offices

8.30 m m²
Busan New Port Distripark — FTZ + value-added logistics

1,000 acres
Port Klang Free Zone — free commercial + industrial zone

2025 container throughput

9 benchmark ports from the 2024 global Top 10 (million TEUs)

Jebel Ali is not charted because a comparable official FY2025 total is not available.

Identified supporting zones

Port (WSC 2024 rank) → zone

PORT	SUPPORTING ZONE
Shanghai (1)	Shanghai FTZ / bonded logistics areas
Singapore (2)	Tuas industrial estates
Ningbo-Zhoushan (3)	Zhoushan Comprehensive Bonded Zone
Shenzhen (4)	Qianhai-Shekou FTZ
Qingdao (5)	Qingdao Pilot FTZ Area
Guangzhou (6)	Nansha FTZ / bonded port area
Busan (7)	Busan New Port Distripark
Tianjin (8)	Dongjiang Free Trade Port Zone
Jebel Ali (9)	JAFZA
Port Klang (10)	Port Klang Free Zone

Source: World Shipping Council — Top 50 Container Ports (statistics 2024). Review of the Top-10 WSC 2024; not an estimate for all ports worldwide.

Container vessel activity is shifting away from Java. Port calls by island from Lloyd's List Intelligence, indexed to 2019 = 100, plus each island's share of national container port calls.

Java's share of national container port calls

69% → **47%**

2016 — 6M 2026

Java's share fell from 69% in 2016 to 47%, while Sumatra, Kalimantan, Sulawesi-Maluku, Balnusra and Papua gained.

Source: Lloyd's List Intelligence.

ARDL bounds test: exports vs exchange rate & BI Rate. A model of Indonesia's exports against the USD/IDR exchange rate and BI Rate to support the Industry Outlook 2026.

Bounds test

F-statistic vs I(1) upper bound at 5% (n = 15)

✓ Cointegration — long-run relationship confirmed

VARIABLE	COEF.	PROB.
Exchange rate (USD/IDR)	−2.6139	0.0442
BI Rate	−2,210.57	0.0097
Constant	78,155.54	0.0035

Port benchmark: all 10 of the top container ports reviewed have a logistics, industrial or free-trade zone linked to the port.

Vessel activity: Java's share of national container port calls fell from 69% (2016) to 47% (6M 2026).

Model result: F-statistic 6.783 exceeds the 5% upper bound (4.428) — both rates have a significant long-run effect on exports.

Area	Finding from the data	Implication
Port ecosystem	All **10 of 10** top container ports reviewed run logistics, industrial, bonded or free-trade zones linked to the port.	Leading ports grow through supporting ecosystems, not terminal handling alone.
Vessel activity	Java's share of container port calls fell from **69%** (2016) to **47%** (6M 2026).	Container growth is shifting to ports outside Java.
Exchange rate	+1 IDR per USD → exports fall about **USD 2.61 million** (significant at 5%).	A weaker rupiah does not automatically lift exports, as many exporters rely on imported inputs.
BI Rate	+1 pp → exports fall about **USD 2.21 billion** (significant at 1%).	Higher rates raise production and credit costs for exporters, reducing export capacity.

Investment Scheme Analysis — Profit Sharing vs Phantom Share

Independent case study (skill test) for a Corporate Investment Staff selection: choosing a financing scheme for PT Alpha Nusantara. Delivered as a recommendation deck (PowerPoint) plus an Excel financial model.

Financial modelling · Excel | IRR | Cash-flow projection | Oct 2026

+41.7%
Projected revenue growth in 3 years (Rp12 bn → Rp17 bn)

72%
of net profit currently absorbed by bank installments

12.3% vs 12.7%
Investor IRR: Phantom Share vs Profit Sharing — nearly equal

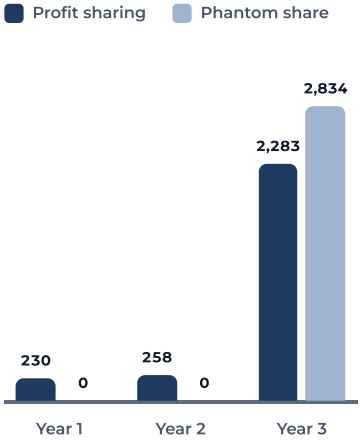

Phantom Share
Recommended: cash Rp230–771 m higher, payout capped at 1.6x

3-year projection
Revenue and EBITDA (Rp billion)

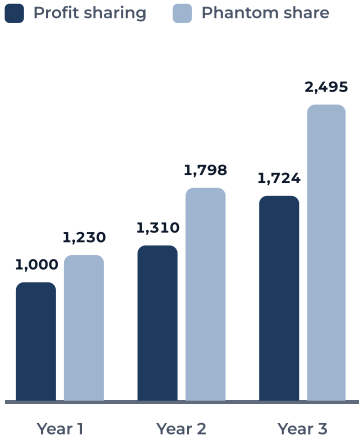

Revenue growth of 15%, 12%, 10% and a constant 15% EBITDA margin.

Payments to investor
Rp million

Profit sharing pays yearly and returns the Rp2 bn capital in Year 3; the phantom share is paid once at the end of Year 3.

Company cash balance
Year-end, Rp million

Before capital return (profit sharing) or the phantom share payout at the end of Year 3.

Recommendation: Phantom share — investor returns are almost the same, but the company keeps more cash during the 3 years.

Area	Finding from the model	Recommendation
Investor return	IRR **12.7%** (profit sharing) vs **12.3%** (phantom share) — only 0.4% per year apart.	Return is not the deciding factor; compare the impact on company cash.
Cash flow	Phantom share keeps year-end cash **Rp230–771 million** higher (Rp2.49 bn vs Rp1.72 bn in Year 3).	Choose the phantom share to keep liquidity for operations and growth.
Debt burden	Bank installments already absorb **72%** of net profit.	Avoid adding routine yearly payouts; a single payout at the end of Year 3 fits better.
Payout risk	Phantom share payout is capped at **1.6x** the investment.	The cap limits the company's maximum obligation if growth beats projections.

Dashboards & web apps

2026 · PELINDO SINERGI LOKASEVA

LIVE DEMO

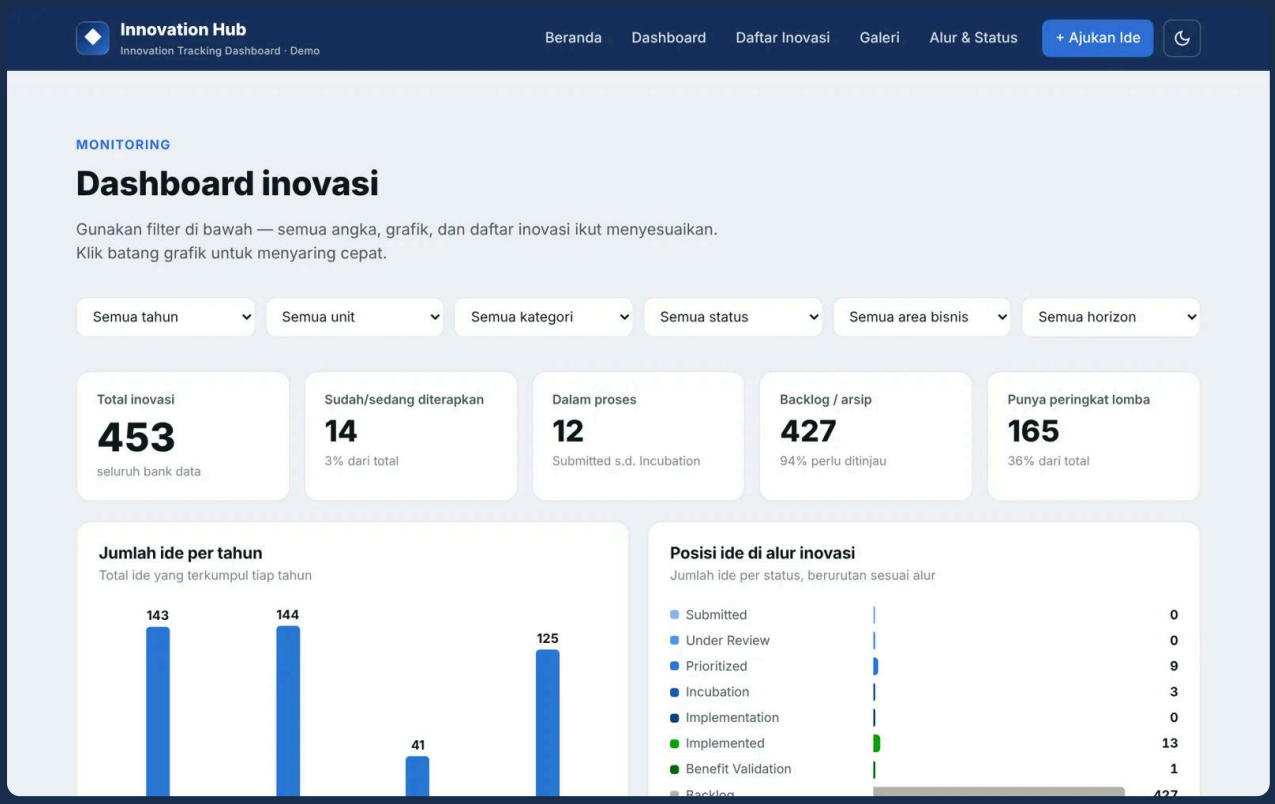

Innovation Hub Dashboard

Google Sheets + Apps Script web app that turns the company's innovation data bank into a live monitoring dashboard: filters, KPIs, charts, a unit × category matrix, a searchable list with CSV export, a gallery and status history. The original reads the Sheet in real time and is internal; the demo below runs the same code on the **real innovation bank (453 ideas), anonymized** — no names, teams or internal descriptions. Try the filters or click a bar. *(Interface in Indonesian, as used at the company.)*

BEFORE
Ideas were collected only when an innovation competition was running, and stayed in separate files afterwards.

AFTER
Any employee can submit an idea at any time, and managers and staff can see every idea, its status and which ones need follow-up — **453 ideas** from 2022 onward in one place.

Google Sheets · Apps Script · HTML · CSS · JavaScript · Data visualization

2026 · KEMENIMIPAS

LIVE DEMO

SI-REKAP PERJADIN – Travel Expense Recap System

Team innovation at the Bureau of Planning and Finance: a Google Sheets + Apps Script web app that replaces manual typing of official travel (perjadin) files into Google Sheets with a form-based input and a reconciliation dashboard — document status per bureau, monthly trend, input/edit forms, master data and a printable report. The demo below runs the original code on the **real 2026 recap** (actual trips, dates and amounts), with staff names, NIPs and SPM numbers anonymized; what you add or edit is saved only in your browser. *(Interface in Indonesian, as used at the ministry.)*

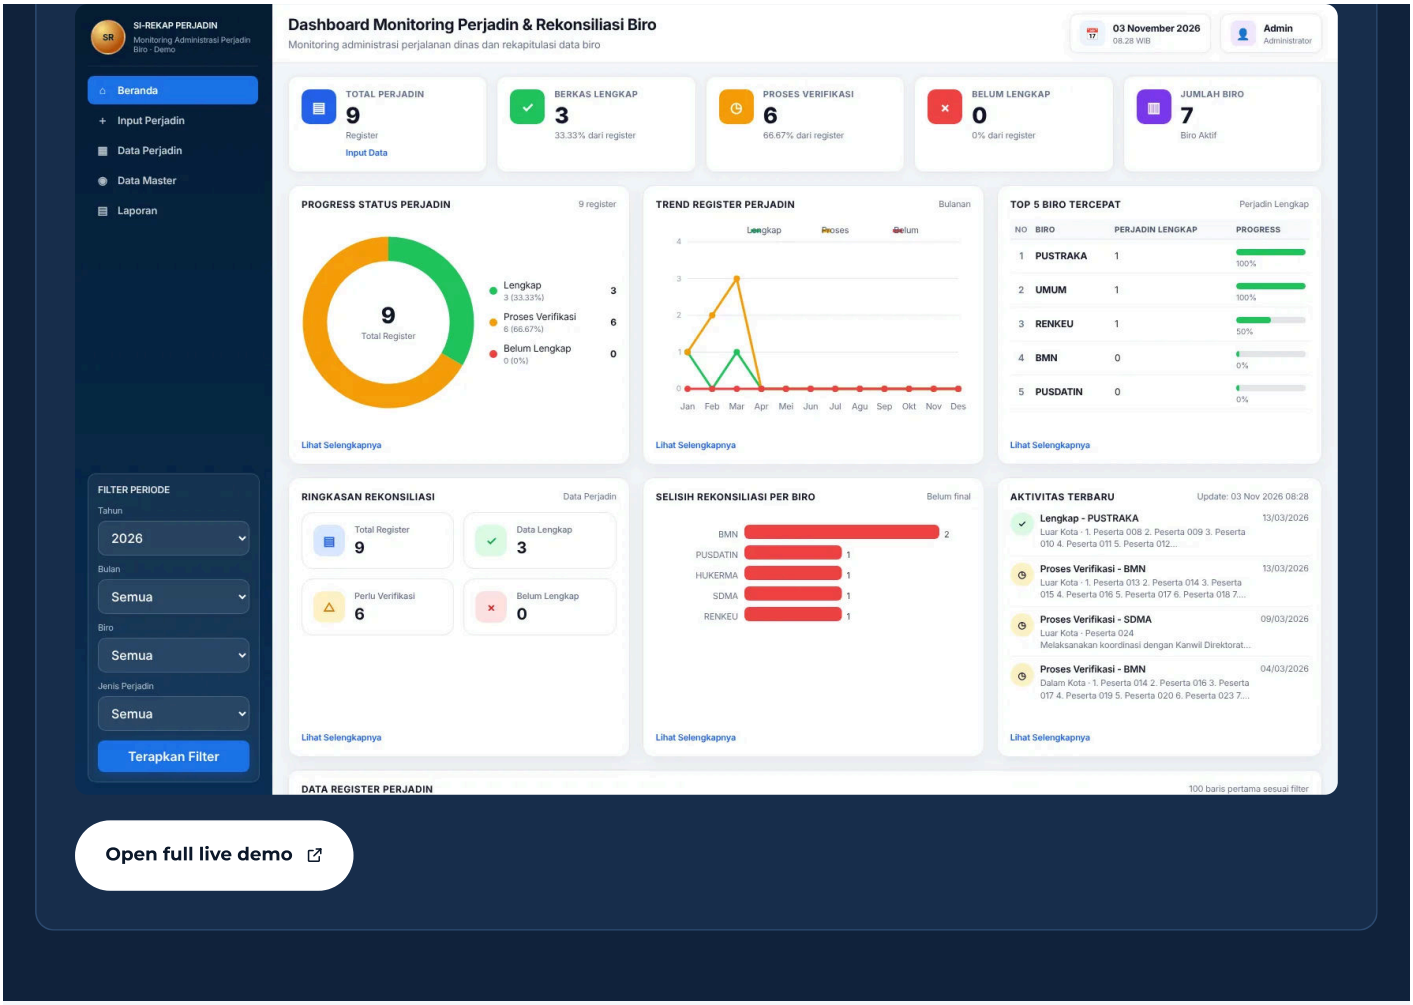

BEFORE

Every travel file was typed into Google Sheets by hand — about **50 files took 3–4 days** of manual input.

AFTER

Each file is entered once through a validated form; the recap, document status per bureau and the printable report update automatically. My innovation prototype has been **handed over to the ministry's IT team**, which is following it up and developing it further; the time saved will be measured once it is rolled out.

Google Sheets · Apps Script · HTML · CSS · JavaScript · Budget reconciliation

Skills

The tools and methods I use in planning, finance and analysis work.

Strategy & finance

- Strategic Planning
- Budget Planning (RKA)
- Financial Reporting
- Supply Chain Planning

Used at Pelindo, Kemenimipas and Pertamina

Research & analysis

- Market Research
- Macroeconomic Analysis
- Econometrics (ARDL)
- Financial Modelling

Used in the Industry Outlook 2026 and investment case study

Tools

- Microsoft Excel
- Stata & EViews
- Google Sheets & Apps Script
- DELMIA Quintiq
- PowerPoint

Excel: Pivot Table, VLOOKUP, data cleaning, data visualization

Soft skills

Analytical Thinking, Problem Solving, Organizational Skills, Attention to Detail, Communication, Public Speaking.

Languages & interests

Indonesian (native), **English** — **EPT score 583** (UMY Language Training Center, Feb 2025). Interested in strategic & corporate planning, financial & economic analysis, and econometrics & data analysis.

Achievements & training

2nd Runner-Up

HERO 11th International Call for Papers 2023

Internal academic competition at the Faculty of Economics and Business, Universitas Muhammadiyah Yogyakarta, themed **“Increasing Economic Resilience in Era 4.0 to Realize Sustainable Development Goals 2030”**.

Yogyakarta, June 2023

Training

Oct 2026

InJourney Aviation Services

Cargo Logistics Preparation Procedures

Training on cargo logistics preparation procedures, completed with a score of 80.

Oct 2026

MySkill

Corporate Finance — Skill Specialization

16-course learning path in accounting, finance and tax.

Jan – May 2026

CAMY Collaboration Academy

Financial Planning & Asset Management · Planning, Organizing & Controlling

Two management trainings, scored 100 and 90.

Feb 2025

BNSP · LSP UMY

BNSP Certificate of Competence

National professional certification issued through the Professional Certification Institute of UMY.

Sep 2024

Universitas Gadjah Mada

Susenas Data Processing with STATA

Workshop on processing National Socio-Economic Survey (Susenas) data in Stata.

Education

2021 – 2025

Sep 2021 – Apr 2025

Universitas Muhammadiyah Yogyakarta

Bachelor of Economics · International Class · GPA 3.84 / 4.00

International Program for Islamic Economics and Finance (IPIEF)

Thesis: Analysis of Factors Affecting Agricultural Value Added (AVA) in Southeast Asia

View in UMY Repository
